EDUCATION

Bachelor of Technology., Computer science and Engineering

Graduating 2022 - 2026

parul University, vadodara, gujarat

Relevant coursework: Operating system, Artificial Intelligence, Machine learning, Data Structures, Networking

TECHNICAL SKILLS

Frameworks & Libraries: LangChain, Streamlit, TensorFlow, PyTorch, Hugging Face, Ollama

Databases & Infrastructure: ChromaDB, FAISS, LanceDB, Multi-Agent (Crew AI)

Machine Learning & AI: Generative AI, Large Language Models (LLMs), Transformers, RNN, LSTM, GRU, Bidirectional RNN, Retrieval-Augmented Generation (RAG), Vector Databases, AI Deployment

Platforms: LangSmith, LangServe, Hugging Face Spaces

Programming: Python, JavaScript, SQL, Html, Css, C++

ACADEMIC PROJECTS

Human-AI Collaboration Assistant (Agentic AI, LLMs) :

Nov 2025 – Present

Developing an AI system that enables seamless collaboration between humans and intelligent agents.

- Built using Python, LLMs (GPT/Llama), Streamlit, and agentic AI workflows.
- Implemented real-time streaming responses, tool-use automation, and multi-agent interaction features.
- Designed to improve productivity through contextual understanding and efficient human-AI task delegation.

AI Resume Analyzer :

Developed an AI-driven system to extract

- Automated Groq LLM integration, PDF parsing, skill/experience scoring, and Excel report generation.
- Built robust batch processing and auto-email delivery for high-throughput candidate analysis.
- Added section-specific feedback, recommendations, and improvements to enhance decision making.

Creating a Search Engine using LangChain Tools and Agents :

Built an intelligent search engine leveraging LangChain tools and autonomous agents to retrieve and rank information from various sources dynamically.

- Utilized LangChain and OpenAI API for dynamic search and ranking.
- Designed agent-based retrievers for multi-hop reasoning and accurate answer synthesis.

Gen AI Chatbot with SQL Database :

Engineered a chatbot to dynamically fetch and summarize SQL database data for decision-making.

- Developed using LangChain SQL Toolkit, PostgreSQL, and OpenAI API.
- Automated user query-to-SQL translation with context-aware follow-ups and result summarization.

OTHER WORK EXPERIENCE

- Trained and developed projects in Generative AI, LLMs, and RAG techniques.
- Built and deployed AI chatbots, vector DB solutions, Streamlit-based interfaces, and Flask applications.
- Deployed scalable AI applications on AWS, Azure, and Hugging Face.
